The Lodges

The decor of the eight lodges which are inspired of the contemporary and minimalist style reflects the historical side of place. Indeed, the site on which the lodges are erected is that of a former lime kiln. The demolished stones which were buried on the site were used to adorn the walls of the rooms.

The raw materials used are a mixture of stones, wood and polished concrete to give a unique style to the lodges. The beds face the window bay and nature which invites meditation and rest. The lounges overlook a private garden equipped with relaxing chairs and an individual swimming pool in the Prestige
